

AIR TRAFFIC MANAGEMENT

Communication systems and ADS-B solutions delivering performance and reliability without compromise, for safer ATM operations.

BECKER

BECKER

Becker Avionics provides communication, navigation, surveillance and search & rescue equipment for airborne and ground applications. Reputed for our premium quality and undisputed reliability for over 60 years, we deliver customer-centric solutions engineered to sustain the harshest mission environments and safety requirements. Every day, thousands of pilots, air traffic controllers and mission operators rely on our technology around the world. We work hard every day to exceed their expectations.

AIR TRAFFIC MANAGEMENT

Our product line dedicated to air traffic management and airline operations features communication systems and ADS-B solutions designed with state-of-the-art technology.

-
- **60 years of worldwide expertise** in ATC solutions.
-
- **Minimized workload** for installers thanks to computer-based configuration.
-
- **Robust design** for superior reliability and durability.
-
- **Longer product lifecycles** thanks to optimized maintainability.

BENEFITS

Air traffic services require reliable communication systems to conduct safe flight operations. Our ATC radios and ADS-B solutions offer proven robustness and comply with the latest industry requirements.

They can be integrated with other manufacturers' equipment or can be offered as tailored solutions for applications in control towers, airport vehicles or airline operations centers.

OUR PRODUCTS

COMMUNICATION

TG660 / GT6201 / GK61X RADIO STATIONS GROUND TO AIR COMMUNICATION

- > durable and robust communication systems
- > respond to the latest requirements and the needs of ATM operators
- > fulfils ETSI and FCC standards
- > field-proven reliability

TG660

watt 6 / 10 25 / 50	Khz 8.33 25	versions fixed mobile	remote controllable
---------------------------	-------------------	-----------------------------	------------------------

GK615 & GK616

watt 6 10	ETSI	mobile VHF
-----------------	------	---------------

SURVEILLANCE

ATLASS

- > ADS-B Traffic Localization & Surveillance System
- > state-of-the-art flight and airport traffic monitoring system
- > provides a recognized air and ground situation
- > mission-critical data available at limited costs
- > reduced numbers of system components

ADS-B TRAFFIC LOCALIZATION & SURVEILLANCE SYSTEM

ADS-B	flight tracking	ground traffic	all in one
-------	-----------------	----------------	------------

BAV6215 ADS-B VEHICLE TRANSPONDERS

- > compact and fully autonomous low power ADS-B transponder for airport vehicles
- > periodically reports the position and speed of airport vehicles
- > fully configurable through software tool
- > programmable vehicle identification codes and category labels
- > provides traffic information for airport and apron management

BAV6215

ADS-B out	Vehicle squitter	fixed portable
